

PRODUCT FEATURES

The **RE.CORDER** is a classic acoustic soprano recorder with:

- Built-in wireless connectivity and sensor platform
- Touch sensors which detect fingering
- Pressure-sensor measures the strength of the breath
- Additional inertial sensor for adding musical expressiveness to one's playing.

The **RE.CORDER** can be used as:

- Full functional traditional acoustic soprano recorder (acoustic sound can be muted to engage digital instrument)
- Classic-style recorder with digital output
- MIDI instrument / controller
- Customized fingering and modes to allow for physical challenges (simplified fingering, lip sensor instead of pressure, and more!)

It is equipped of:

- ✓ Micro USB recharge port
- ✓ LiPo Battery
- ✓ BLE MIDI wireless interface
- ✓ 3D accelerometer
- ✓ Light and durable body
- ✓ Touch sensitive note holes
- ✓ Free educational and play-along **RE.CORDER** App for Android and iOS

The **RE.CORDER** App Features:

- Learn-and-play songs
- Play a selection of classical, rock, and pop scores and earn points
- Play solo with digital teacher - highlights errors while playing
- Play with a friend on the same app with the DUO function.

The package includes:

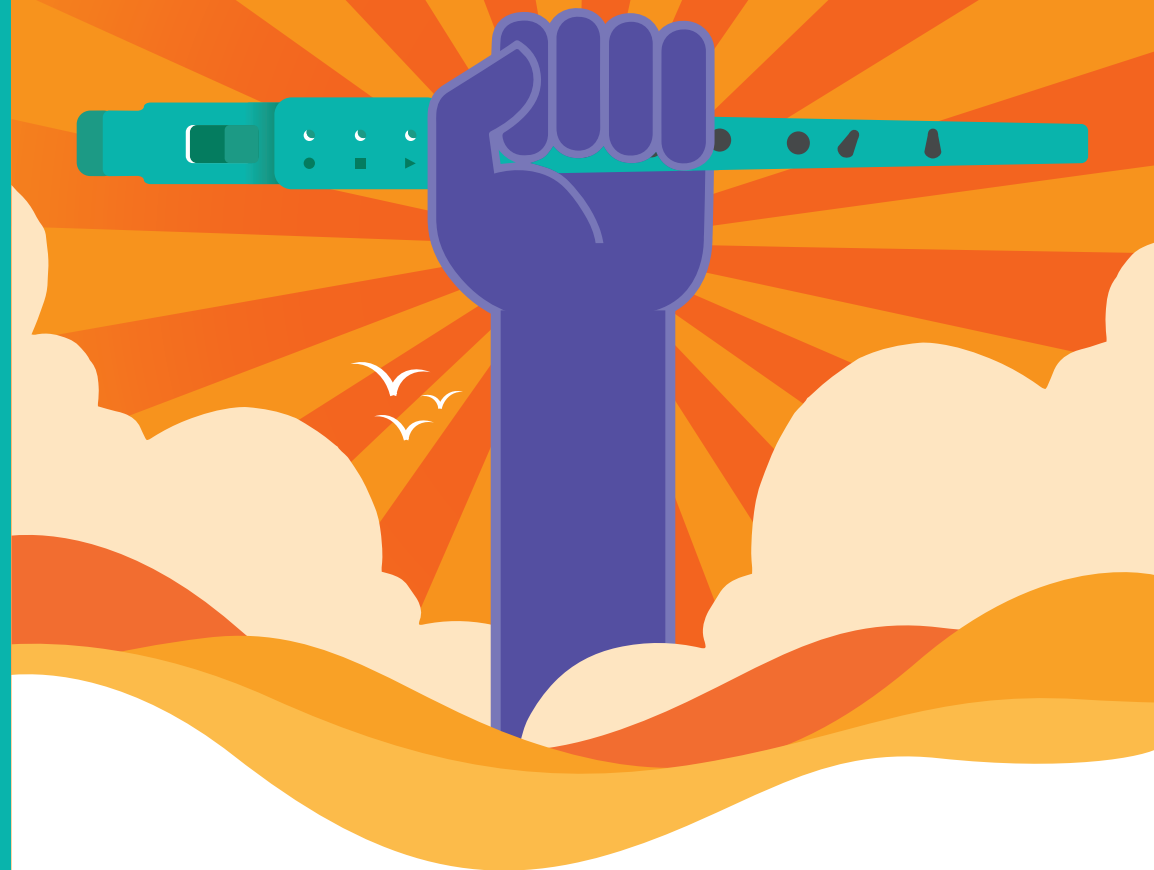

- **RE.CORDER** Instrument
- Quick start manual
- Cleaning rod
- USB cable type A to micro B

Weight: 120g

Color: black, white, blue, red.

Made in Italy

the recorder, re.invented

The ARTnoise **RE.CORDER** is a brand-new take on the classic soprano recorder. With its built-in wireless connectivity, digital sensor platform, and interactive app, **RE.CORDER** takes the traditional recorder into the future.

A series of digital touch sensors detect the player's fingering and a pressure-sensor measures the strength of the breath that generates the musical tone.

RE.CORDER can also connect to a mobile device or a pc/mac and communicate in real-time its complete musical data including its status, the notes played, the pressure strength and accelerometer data.

RE.CORDER connects the traditional and modest instrument into a world of sounds and creative usages by exploring the infinite capabilities of its state-of-the-art digital platform.

class.room app turn the classroom into an orchestra!

class.room is a brand new app developed for schools that will turn the classroom into an orchestra by allowing music teachers to configure orchestral sections and assign different parts of a score.

class.room runs on Apple M1 iPad and can connect up to 14 re.corder to the same device, allowing the teacher to:

- ✓ Assign different instrumental sounds to each student
- ✓ Choose increasingly complex scores and multi-part scores
- ✓ Use alternative playing modes (lip sensor and keyboard) to help the inclusion of subjects with disabilities
- ✓ Create and save "groups" with different settings
- ✓ Check notes played by students in real time
